3.

Nowadays, climate is changing more and more and we have extraordinary weather conditions. For example, in 2020, Turkey had the hottest May with 44 degrees Celsius. The cause of this is global warming. Global warming causes the temperatures to increase day by day. As a result of the global warming, glaciers are melting, sea levels are increasing and forest fires are taking place more.

If this fast change in climate continues, we'll have disasters in every part of the world such as heavy rains, severe floods and droughts. The main question is that: "Who is responsible for global warming?" Man-made activities are the first reason for this natural phenomenon; so we should immediately do something to stop it!

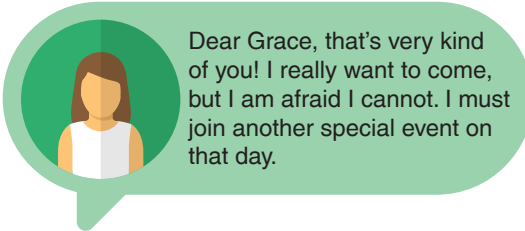

Which of the following is TRUE according to the text above?

- A) There is no way to prevent global warming.
- B) The planet is cooler now than it was 50 years ago.
- C) We must take necessary precautions not to have more disasters.
- D) Humans always take actions for the problems of the world.

4. Emma's best friend, Grace, invites her to a rock concert on Saturday. She really wants to go, but her brother's birthday party is on the same day. So, Emma sends her a message to apologize and explain why she cannot attend the event.
