TEST 8

Read the text and answer 4th and 5th questions according to it.

Lion: the king of the forest. Lions are called “the king” because they are very muscular, strong, and they are predators. “Predator” is an animal that hunts animals and eats their prey. Lions’ paws are not sharp, so they kill by their teeth. Lions can hunt alone, but they also hunt in groups. A group of lions get together and catch their prey. They hunt silently, but when they want to talk to each other, they roar. They eat most of the animals, but their preys are generally zebras or giraffes because they are slower. They can eat more than 4 kilograms of meat every day.

4. Which of the following DOES NOT have an answer in the text?

1.

Martin : Hey, mate. Did you watch the latest episode of "Black Mirror"?

David : No, I didn't. How was it?

Martin : It was amazing! People had brain chips and they recorded everything in their lives.

David : It's interesting. I guess I will watch it on Internet tonight.

Martin : Do you think people will have brain chips in the future?

David : Definitely.

Martin : Do you think we can use them?

David : I don't know, but I think our grandchildren can use brain chips.

Which of the following **COMPLETES** the conversation?

- a) I believe people will have brain chips thanks to technological improvements
- b) Communication will be very easy in the future
- c) I'm so curious about the next episode
- d) Maybe robots will have chips in their brains

2.

How will the transportation be in the future?

There will be flying cars, so there will be less traffic.

The Internet will be the centre of education.

There won't be any computers, we will only use mobile phones.

I think people will use trains more than planes because there will be more traffic in air.

Whose answers **ARE NOT** related to the question?

- a) Ahmet and Aybüke
- b) Irmak and Oğuz
- c) Irmak and Ahmet
- d) Oğuz and Aybüke

3.

In 2070, we will probably have a more different world. Everything will change with technology. For example, people won't go to work by bus. There will be flying cars or even flying bicycles! Maybe we won't eat food, scientists will find an alternative to food. I guess there won't be any televisions or radios. People will use mobile phones and computers more. Of course, everything won't be useful and great. I think we will probably see interesting weather conditions because unnatural changes will harm atmosphere and the weather.

Which of the following **DOES NOT** have any information in the text?

- a) Transportation
- b) Professions
- c) Climate
- d) Communication

UNIT 9

1.

Teacher: What are the causes for soil pollution?

John: Mining harms the soil.

Mark: People throw garbage on the forests and garbage is harmful for the land, they should stop it.

Jane: Pesticides are poisonous for soil, plants, and animals.

Theo: Nuclear waste threatens the soil seriously.

Which of the following IS NOT correct according to the conversation?

- a) Theo thinks nuclear waste causes soil pollution.
- b) Mark thinks people are careless about forests.
- c) Jane thinks pesticides can't be a cause for soil pollution.
- d) John thinks mining has a bad impact on soil.

2.

Global warming causes loss of habitat for polar bears.

Chemical waste pollutes the rivers and seas.

Using electricity and water so much can be dangerous for our future.

Which of the following DOES NOT have any information about?

- a) Energy waste
- b) Animal extinction
- c) Water pollution
- d) Deforestation

3.

Many different dangers threaten today's world. Greenhouse gases, water pollution, deforestation, and global warming are some of them. They harm nature's balance, but we can prevent them with simple solutions. For example, we must stop wasting energy sources at home to prevent global warming. We must stop throwing garbage on rivers, lakes or seas. We mustn't harm trees or pollute forests. These are some easy things we can do.

Which of the following DOES NOT complete the text?

- a) We can use energy sources carelessly and save the world
- b) We can protect the environment easily
- c) We must take action and save the world with these solutions
- d) We shouldn't destroy the nature for a better future

Which of the following IS NOT one of the teacher's questions?

a) When did Pluto become a dwarf planet?

b) Which planet is further from the Sun?

c) Is there gravity on the moon?

d) Which planet is colder than others?

1. Mercury is one of the eight planets in the solar system. It's closer to the Sun than other seven planets. It's also smaller than others. Its orbit is only 4,8794 km.
- The Earth is our planet. Its orbit is 12,742 km, so it's larger than Mercury. It's the third planet from the Sun.
- Jupiter is 778,340,821 km far away from the Sun. It completes one orbit in 142 months.

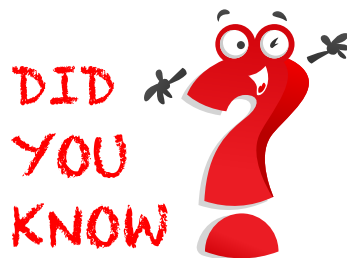

Which of the following **DOES NOT** have any information above?

- a) Mercury's size
b) Jupiter's distance to the Sun
c) The Earth's distance to the Sun
d) Jupiter's size
2. Technology developed in time, and we have a lot of information about space and the planets, but still there isn't any evidence of the life on the other planets. Scientists did research about it for years, but we don't have much information. NASA even sent a space shuttle equipped with many cameras to the Mars in 2021. Its name is Perseverance, and it has 23 different cameras to record sounds and images. NASA shared first videos from Perseverance on the Internet and people watched it a million times. It will be on Mars to discover it until April 2023.

Which of the following **IS NOT** correct according to the text?

- a) Perseverance can record sounds and images on Mars.
b) Scientists did research and found proofs of life on Mars.
c) We have many information about space with the help of technology.
d) NASA's space shuttle will discover Mars for two years.

3. *Many people know the dwarf planet Pluto. It was a planet before, but it's a dwarf planet now. Did you hear about Eris? Scientist discovered it in 2005, and it's in the same category as Pluto. It's smaller than Pluto, but larger than other dwarf planets. It's 10,120,000,000 km away from the Sun. It orbits the Sun in 560 Earth years.*

Which of the following **IS NOT** correct according to the text?

- a) Scientists didn't know about Eris before 2005.
b) Eris completes an orbit in 560 Earth years.
c) Pluto is larger than Eris.
d) Eris is the third dwarf planet in size.

5. Ahmet prepares a poster for the World Environment Day.

Which of the following is SUITABLE for the poster?

- a) USE PESTICIDES MORE
b) POLLUTE AIR
c) DESTROY FORESTS
d) USE RENEWABLE SOURCES

6. The average temperatures of planets in our solar system are:

- Mercury - 800°F (430°C) during the day, -290°F (-180°C) at night
- Venus - 880°F (471°C)
- Earth - 61°F (16°C)
- Mars - minus 20°F (-28°C)
- Jupiter - minus 162°F (-108°C)
- Saturn - minus 218°F (-138°C)
- Uranus - minus 320°F (-195°C)
- Neptune - minus 331°F (-201°C)
- Pluto - minus 388°F (-233°C)

Which of the following IS NOT correct according to the information above?

- a) Neptune is warmer than Saturn and Uranus.
b) Jupiter is colder than Mars.
c) Venus is the hottest of all the planets.
d) Pluto is the coldest of all the planets.
